DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-32, drawn to communication between a base station and a plurality of devices over a wide band channel, classified in class 370, subclass 335.
- II. Claims 33-80, drawn to serial to parallel transformer, classified in class 370, subclass 210.
- III. Claims 81-87, drawn to frequency reuse, classified in class 455, subclass 447.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the inventions I, II and III have different modes or operations.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and for Group III, restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hanh Nguyen whose telephone number is 571 272 3092. The examiner can normally be reached on Monday-Friday 8:30 AM - 5:00PM.
